

Project Title

Srushti School Transport Assistant Chatbot

(Own Family Business)

Internship: Lenovo Leap Internship Program

Submitted By: Samarth Gaur

College: VJTI, Mumbai

Course: MCA

1. Project Objective & Description

Objective

The objective of this project is to develop an intelligent chatbot for Srushti School Transport Services that provides quick and accurate information about school transportation services. The chatbot assists parents and students by answering queries related to school timings, pickup timings, drop timings, transport fees, available schools, and contact information.

Description

The Srushti School Transport Assistant Chatbot is a conversational AI application developed using Google Dialogflow ES. It is designed to automate responses to frequently asked questions regarding school transportation services. The chatbot helps users obtain information instantly without requiring direct communication with the transport provider.

The chatbot currently provides information for the following schools:

- Shri Sayajinath Maharaj EMS
- Army Public School
- SPG International School
- Shramajivi Prathamik Vidhyalay
- St. Anthony EMS

The chatbot also includes a fallback mechanism to handle unknown or unsupported queries.

2. Technologies Used

Technology	Purpose
Google Dialogflow ES	Chatbot development platform
Natural Language Processing (NLP)	Understanding user queries and matching intents
Intent Recognition	Identifying user requests
Training Phrases	Mapping different user inputs to specific intents
GitHub	Project documentation and version control
Microsoft Word	Report preparation
Google Chrome	Testing and chatbot interaction

ChatBot Working Flow:

User Starts Chat

Welcome Intent

User Query

Available Schools Query

Available Schools Response

OR

School Information Query

School Timings

Pickup Timings

Drop Timings

Bus Fees

OR

Unknown Query

Fallback Response

3. Screenshots with Explanation

Dialogflow Agent Creation

This screenshot shows the creation of the Dialogflow agent named "Srushti School Transport Assistant". The agent serves as the main chatbot environment where intents and responses are configured.

Default Welcome Intent :

The Welcome Intent greets users when they start a conversation with the chatbot. It introduces available services such as school timings, pickup timings, drop timings, bus fees, and contact information.

Agent

USER SAYS

COPY CURL

hi

Query

 DEFAULT RESPONSE

Welcome to Srushti School Transport Services. I can help you with: • Available Schools • School Timings • Pickup Timings • Drop Timings • Bus Fees • Contact Information Please enter the school name.

INTENT

Default Welcome Intent

Available Schools Intent:

This intent provides users with a list of schools currently served by Srushti School Transport Services. It helps users know whether transportation is available for their school.

Agent

USER SAYS

COPY CURL

which schools do you serve?

 DEFAULT RESPONSE

We currently provide transport services for: 1. Shri Sayajinath Maharaj EMS 2. Army Public School 3. SPG International School 4. Shramajivi Prathamik Vidhyalay 5. St. Anthony EMS

INTENT

Available_Schools

Army Public School Information Intent:

This intent responds with detailed information about Army Public School, including school timings, pickup timings, drop timings, and monthly transportation fees.

USER SAYS

COPY CURL

army school

 DEFAULT RESPONSE

▼

Army Public School School Time: 7:30 AM to 1:30 PM Pickup Time: 6:50 AM Drop Time: 2:10 PM Bus Fee: ₹1000 per month

INTENT

Army_School_Info

SPG International School Information Intent:

This intent provides complete transportation details for SPG International School, helping parents quickly access relevant information.

USER SAYS

COPY CURL

spg

 DEFAULT RESPONSE

▼

SPG International School School Time: 7:15 AM to 12:30 PM Pickup Time: 6:40 AM Drop Time: 1:00 PM Bus Fee: ₹1000 per month

INTENT

SPG_School_Info

Shri Sayajinath Maharaj EMS Information Intent:

This screenshot demonstrates the chatbot's ability to provide transportation information for Shri Sayajinath Maharaj EMS.

Shramajivi Prathamik Vidhyalay Information Intent:

This intent contains transportation schedules and fee details for Shramajivi Prathamik Vidhyalay.

St. Anthony EMS Information Intent:

This screenshot shows the response generated when a user requests information regarding St. Anthony EMS.

USER SAYS

COPY CURL

st anthony

 DEFAULT RESPONSE ▼

St. Anthony EMS School Time: 8:30 AM to 1:00 PM
Pickup Time: 8:00 AM Drop Time: 1:30 PM
Bus Fee: ₹800 per month

INTENT

St_Anthony_Info

Contact Information Intent:

This intent provides the contact details of Srushti School Transport Services for further inquiries and assistance.

USER SAYS

COPY CURL

contact

 DEFAULT RESPONSE ▼

For transport enquiries contact: Srushti School
Transport Services Mobile: 9307585670

INTENT

Contact_Info

Default Fallback Intent:

The Fallback Intent is activated when the chatbot cannot understand a user's query. It politely informs the user and guides them toward supported services.

USER SAYS

COPY CURL

picnic charges

 DEFAULT RESPONSE ▼

Sorry, I could not understand your request. I can provide information about: • Schools • Pickup Timings • Drop Timings • School Timings • Bus Fees • Contact Information
Example: "Army Public School pickup timing"
"SPG fee" "St Anthony drop time"

5. Conclusion & Summary

Conclusion

The Srushti School Transport Assistant Chatbot was successfully developed using Google Dialogflow ES. The chatbot effectively answers common transportation-related queries and provides instant access to important information such as school timings, pickup schedules, drop schedules, transport fees, and contact details.

The project demonstrates the practical use of conversational AI and Natural Language Processing in improving customer communication and service accessibility.

Key Learnings

- Understanding chatbot architecture and conversation design.
- Creating and managing intents in Dialogflow ES.
- Implementing training phrases and response mapping.
- Handling unknown queries using fallback intents.
- Applying NLP concepts in a real-world business scenario.
- Designing user-friendly conversational interfaces.
